Wolfpack Culture – Partnering is in our DNA

Our key partners:

The ZeroFOX Platform delivers automated threat detection, and also full remediation across social, mobile, digital, and collaboration platforms.

Synack is a penetration testing company that combines AI and machine learning enabled security software with a crowdsourced network of white-hat hackers to help keep its customers secure.

Silensec provide a multipurpose virtual environment in which organisations can test critical capabilities and skills.

NW3C provides a nationwide support system for law enforcement and regulatory agencies tasked with the prevention, investigation, and prosecution of economic and high-tech crime.

The British Standards Institution is the national standards body of the United Kingdom. BSI produces technical standards on a wide range of products and services.

Environmental Analysis

Wolves are masters at studying environmental conditions & making informed decisions based on intelligence gathered.

*Lesson: We invest time to analyse your **specific requirements** - a one-size-fits-all approach rarely works.*

Protection in the Pack

Wolves work together to hunt, raise their young & fend off much larger predators.

*Lesson: Cyber risk management is a **team effort**. Your entire organisation needs to be equipped to defend against cyber threats.*

Call to Action

The wolf howl helps pack members communicate over vast distances & to summon help when attacked.

*Lesson: Stand your ground – heed the call to help protect our **communities**.*

Our Valued Client Partnerships
